Summary

Software Engineer with 2.5+ years shipping production web apps end-to-end, served 7M+ users at Wysa. Strong in React.js, Next.js, Node.js, TypeScript, REST API design, and CI/CD, with full-stack ownership from requirements to deployment

Education

National Institute of Technology Karnataka, Surathkal

Bachelor of Technology

Aug 2020 - Jun 2024

CGPA: 7.99/10

Experience

Frontend Engineer, Wysa

wysa.com

Feb 2025 - June 2026

Bengaluru, India

- Shipped end-to-end features across multi-staged deployments for a mental health platform with 7M+ users, working in an Agile/Scrum environment
- Owned a shared React.js UI component library and the design system used across patient app, therapist console, and clinical dashboards, while contributing to underlying Node.js backend architecture and REST API design
- Built outcome-tracking flows aligned with clinical assessment standards used in NHS and US Collaborative Care (CoCM) workflows
- Drove full feature lifecycle from requirements to production with Jest and Mocha unit testing, GitHub Actions CI/CD pipelines, and clinical risk review at every release

Web Developer (Agency Owner), Webease Tech

webease.tech

May 2024 - Feb 2025

Remote, India

- Architected and delivered full-stack web applications for global clients, optimizing Core Web Vitals (LCP, CLS, FID) to achieve sub-2s load times on production deployments
- Led client discovery sessions to define technical requirements and shipped MVPs end-to-end, from system design to production deployments
- Scaled agency revenue 3x through strategic positioning, organic content marketing, and client referrals across LinkedIn

Full Stack Developer, Dobby Ads

dobbyads.com

Jun 2023 - Mar 2024

Remote, India

- Built core internal systems including order management, task management, and employee monitoring tools, supporting 70+ daily active users
- Designed and integrated LLM-powered REST API workflows with prompt engineering pipelines to automate order priority checks and error detection, reducing managerial workload by 30%
- Redesigned UI/UX across agency and client portals using React.js and TailwindCSS, driving a 25% increase in user engagement

Skills

Programming Languages: JavaScript, SQL, TypeScript, Python

Frameworks and Libraries: React.js, Next.js, Node.js, Express.js, Redux, Tanstack

Databases: MongoDB, PostgreSQL, MySQL, Redis, Vector Databases

Cloud and DevOps: AWS EC2, Docker, GitHub Actions, CI/CD

Testing: Jest, Mocha, Chai, Playwright, Unit Testing, End-to-End Testing

Concepts: REST APIs, System Design, Object-Oriented Programming, Data Structures and Algorithms

Tools: Git, GitHub, Supabase, Sentry, Kibana

Projects

Denshees, Cold Email Marketing Platform

denshees.com

Next.js, Hono.js, PostgreSQL, Hetzner, Docker, CI/CD, IMAP, Message Queue

- Automated cold email campaigns with delays, follow-ups, start/pause, and dynamic-placeholder templates for per-lead personalization
- Built dashboard tracking open, reply, and bounce rates with engagement funnel charts across all campaigns
- Implemented conversational agent that runs the full workflow through chat, mirroring all UI capabilities via prompts

Certifications

MongoDB Associate Developer Exam (MongoDB)

Data Structures and Algorithms (GeeksForGeeks)
